

## ProductView Express

**Want to view Pro/ENGINEER files over the Web? The new version of ProductView Express, now supporting Pro/ENGINEER Wildfire 2.0, has arrived.**

ProductView Express will allow engineers and others involved in the product development process to view Pro/ENGINEER designs without needing Pro/ENGINEER installed on their computers. ProductView Express is a simple-to-use Web browser plug-in for viewing parts, assemblies and numerous drawing types. It's available for Windows, UNIX, and Linux and can be downloaded free of charge from [www.ptc.com](http://www.ptc.com). Plus, ProductView Express utilizes PTC's patent-pending Shrinkwrap technology, so you can work with even the largest assemblies.

### Capabilities Overview

- Quickly view Pro/ENGINEER object types within your web browser:
  - Parts
  - Formats
  - Assemblies
  - Diagrams
  - Drawings
  - Sections
  - Layouts
  - PIC files
- Dynamic spin, pan, zoom, and fly-through capabilities
- Display objects in Wireframe, Hidden Line, No Hidden, and Shading  
Control graphical performance using FPS (Frames Per Second)
- Supports the PTC patent-pending shrinkwrap technology, so you can work with even the largest assemblies
- Control the size of the viewing area
- Printing supported through Web browser print functionality

### Benefits

- Accelerated time to market by enabling dispersed project teams to view Pro/ENGINEER files over the Web regardless of their technical proficiency
- No training required - simple user interface is consistent with the new look and feel of Pro/ENGINEER Wildfire 2.0
- Available free of charge from the PTC website
